SUMMARY

Software Engineer with 4+ years of experience.
Authorized to work in the US without sponsorship.
Open to relocating to New York, San Francisco, and Washington, DC.

WORK EXPERIENCE

Axon Enterprise, Scottsdale, Arizona, Remote

November 2024 – Present

Software Engineer

- Develop C# data migration packages using SQL schema mapping to migrate digital evidence from legacy systems into Evidence.com.
- Engineer data integration and transformation pipelines supporting migration of petabytes of digital evidence with accurate and reliable ingestion.
- Collaborate with Data Solutions Engineers to execute migrations, validate results, and prevent data loss or corruption during transfers.
- Conduct peer code reviews and manage release workflows through Azure DevOps, maintaining code quality, correctness, and engineering standards.

Yardi Systems, Oxnard, California

June 2022 – November 2024

Software Engineer

- **Reduced invoice processing time by 80%** by developing a scalable Angular and SQL Server web application and integrating OCR-based data extraction in collaboration with the AI team.
- Rebuilt 100% of the front-end architecture and UI using C# and .NET, improving application usability and maintainability.
- Developed and maintained 3+ REST APIs to enable seamless data exchange between internal products.
- **Reduced stakeholder response time by 99%** by implementing SMTP-based automated notifications for invoice receipt confirmations and documentation.
- **Improved data processing efficiency by 25%** by developing a database-driven web application using Java and MySQL.
- Designed and updated SQL Server database schemas, tables, columns, and indexes to support evolving invoice automation requirements.
- Resolved 10+ software issues weekly through debugging, code reviews, testing, and corrective implementations to improve application reliability.
- Automated vendor discovery and enhanced search capabilities by integrating Oracle database queries.
- Created 3+ database reports weekly and maintained existing reports to support business reporting and data analysis.
- Collaborated with QA and DevOps teams to troubleshoot defects, improve code quality, and support reliable software releases.

TECHNICAL SKILLS

Languages & Tools: Python, Java, C++, SQL, Git, Linux, VS Code, HTML, CSS, JavaScript, TypeScript, Go, Rust, Bash, JSON, YAML, GraphQL, Postman

Frameworks & Libraries: React, Node.js, Flask, FastAPI, Django, Express, Spring Boot, Next.js, Redux, Tailwind CSS, Angular, Vue.js, JUnit, PyTest, Jest, Cypress, Selenium, gRPC

Databases & Storage: PostgreSQL, MySQL, MongoDB, Redis, Firebase, DynamoDB, Cassandra, SQLite, Elasticsearch

Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, Terraform, CI/CD, Jenkins, ArgoCD, Helm, Prometheus

Systems & Architecture: Microservices, REST/GraphQL APIs, WebSockets, Kafka, RabbitMQ

EDUCATION

California State University, Fullerton, California

B.S. in Computer Science
